REFILLABLE PET
SKINCARE JAR

**With Monro's continued focus on sustainability, refillable gets recyclable!
Packaging simply being refillable doesn't go far enough, the latest addition to the Monro Cosmetics portfolio sees the refillable jar becoming even more sustainable...**

The majority of luxury double walled jars on the market use unrecyclable materials such as acrylic. Our jar has a thick-walled PET outer jar that 100% recyclable and has a premium glass like finish with the added safety of plastic.

The inner jar and cap is manufactured in PP which works perfectly for most skincare formulations and SPF's making it an ideal choice! The PET outer and PP inner are two of the most widely recycled plastics, which means this jar is 100% recyclable and refillable. The inner jar easily separates and the refill can be quickly inserted with a 'click'.

A wide range of decoration techniques are possible on this pack to suit your requirements. Currently available in 50ml and 100ml capacities with more capacities coming soon all at a 5k MOQ!

Contact Dave and Sarah at cosmetics@monro.co.uk to find out more about this product and our range of sustainable solutions.
